Hunain Haider

I help businesses get more leads with high-converting websites & AI automation | Web Dev + Shopify + SaaS
Karachi Division, Sindh, Pakistan

Summary

I help businesses turn ideas and manual processes into simple digital systems that save time, reduce effort, and improve efficiency. I build web applications, SaaS platforms, and automation solutions that help startups and businesses operate in a smarter and more organized way. My focus is not just development — I focus on solving real business problems through technology. What I help with:

- Business websites and web applications
- Custom software for operations and workflows
- SaaS platforms for scalable business models
- AI-powered automation to reduce manual work
- System design and full product development

I work closely with clients to understand their problem first, then build a practical solution that actually works in real business environments. If you have an idea or want to improve your business using technology, feel free to reach out. I'll help you figure out the right direction.

Experience

WEB GAEBEL

2 years 5 months

I Build Web Apps, SaaS & AI Systems That Help Businesses Automate, Scale & Grow

February 2025 - Present (1 year 5 months)

Sindh, Pakistan

I help businesses turn ideas and manual processes into simple, scalable digital systems that save time and improve efficiency.

At WebGaeble, I build web applications, SaaS platforms, and AI-powered solutions for startups and businesses that want to grow and automate their operations.

I work closely with clients to understand their business problems, then design and develop practical solutions that actually solve those problems.

What I focus on:

- Custom web applications for business operations
- SaaS platforms built for scalability
- AI-based automation to reduce manual work
- System design and technical implementation
- End-to-end product development

Every project is built with a simple goal: make business operations easier, faster, and more efficient.

If you have a business idea or want to automate your work, feel free to message me — I'll help you figure out the right solution.
